

Econ 2

Principles of Macroeconomics

Lecture 17:

Aggregate Demand/Aggregate Supply

Entire Macroeconomy

- Money Supply = 1 trillion
- Interest Rate = 5%
- Price Level = 100
- $Y = \bar{Y} = 10,000$

Shocks to the Macroeconomy

- Connect model to real-world data
- During the Great Recession, is there evidence that:
 - housing prices fell
 - output and CPI decreased
 - government spending increased
 - tax revenue decreased
 - interest rates decreased (money supply increased)

Housing Prices

GDP/CPI

Taxes and Government Expenditures

Interest Rate and Money Supply

Shocks to the Macroeconomy

- Start at Full-Employment output
- Covid-19 Pandemic: how do P^* and Y^* change?

Shocks to the Macroeconomy

- Start at Full-Employment output
- Covid-19 Pandemic: how do P^* and Y^* change?
- How should the government or Fed respond?

Demand Shocks to the Macroeconomy

- Demand Shock:
- Counter-Cyclical Policy:

The Federal Reserve During COVID

- Emergency Rate Cut I on March 3rd, 2020
 - Fed Funds Rate: 1.0 to 1.25%
- Emergency Rate Cut II on March 15th, 2020
 - Fed Funds Rate: 0 to 0.25%
- Only unconventional tools remain
 - Buying mortgage-backed securities
 - Lower reserve requirements for banks
- All meant to increase AC, I^P

Federal Funds Rate and M1, 2005-2022

Government Expenditures and Taxes, 2005 - 2002

Supply Shocks

- Supply Shock: Change in AS that moves economy away from full-employment equilibrium
- How do we know if a recession is caused by a supply shock instead of demand shock?

Supply Shock

- How should the government respond to a recession driven by a decrease in AS?
- Option 1: Fight unemployment, bring economy back to $Y\text{-bar}$

Supply Shock

- How should the government respond to a recession driven by a decrease in AS?
- Option 2: Fight rising prices, bring prices back to P^*

Historical Supply Shocks

- OPEC Oil Embargo in the early 1970s
- Microeconomic Consequences: Gasoline shortage

Historical Supply Shocks

- Did prices rise as output fell?

Historical Supply Shocks

- How did the Federal Reserve respond?

Federal Reserve Today

Wage Growth, Unemployment Rate, and CPI Inflation

Federal Reserve Today

Consumer Sentiment and Permanent Job Losers

Federal Reserve Today

Consumer Sentiment and Permanent Job Losers

Federal Reserve Today

Oil Price Up 88% in 10 Days, 16 Hours

Federal Reserve Today

Oil Price Down 36% in 1 Day, 12 Hours

Federal Reserve Today

Oil Price Up 16% in 8 Hours

Federal Reserve Today

- Political and Economic Uncertainty
- Tariffs → inflationary?
- What will they do at their meeting next week?
- New Fed Chair in May?
- What will they do by the end-of-the-year?

Housekeeping

- Final Exam: Wednesday, March 18th, 9am – 11:00am
- 40 Questions, spread roughly even among topics
- Unless you have heard otherwise, you have full participation
- Indeed.com: apply, apply, apply!
- Evaluations

Topics for the Final Exam

Part 1 (Weeks 1 – 5)

- Supply and Demand (Chapter 2)
 - Gasoline Market (2.3, 2.4)
 - Housing Market (2.5)
- Course Goals (Chapter 3)
 - High Standard of Living (3.1)
 - Real vs. Nominal GDP
 - GDP Deflator Inflation Rate
 - Stable Prices (3.2)
 - CPI Inflation Rate
 - CPI vs. GDP Deflator
 - Unemployment Rate (3.3)
 - BLS Calculation
 - Involuntary Part-Time Workers
 - Discouraged Workers
 - Limitations

Part 2 (Weeks 5 – 10)

- Short-Run Equilibrium (Chapter 4)
 - Consumption Function (4.1)
 - Aggregate Expenditures (4.2)
 - Short-Run Equilibrium (4.3)
- Fiscal Policy (Chapter 5)
- Monetary Policy (Chapter 6)
 - Money Market (6.1, 6.2)
 - Monetary Policy (6.3)
- Agg. Demand/Agg. Supply (Chapter 7)
 - Agg. Demand/Agg. Supply (7.1)
 - Complete Equilibrium (7.2)
 - Policy Responses (7.3, 7.4)
